

8TH GRADE

OUTDOOR REC & NATURE CLASS

OUTDOOR EXPLORATION

Our 97 acres of campus will serve as the classroom for this one hour/week recreation and nature study course. Students will learn the skills of observation and will grow in their ability to understand the natural world around them.

SURVIVAL SKILLS

Students will learn what it takes to survive outside for a night (or more in a pinch!). With skills such as fishing, campfire building, outdoor safety, tracking, map skills, and so much more, they will be prepared for it all.

OBSERVATION READINESS

Students will grow in their ability to understand the natural world around them as they study aquatic life, trees, animals, and plants with outdoor lessons and field guide materials.

UNPLUG OUTDOORS

Students will share the experience of unplugging together outdoors for one hour and slowing down to learn about God's marvelous world.

THIS CLASS WILL MEET ON MONDAYS, 1HR./WEEK, DURING THE 2ND SEMESTER
